PREVIOUS PROJECTS

East African Breweries: Participated in project SAHI, in the batching of raw materials for both UDV and KBL. The project improved efficiency in the handling and management of raw materials within the information system.

ESL Logistics ERP: Participated in the design, development and deployment of ESL logistics Information system. This digitized all operations of the organization, improved operational efficiency and customer service within the organization and its subsidiaries.

Kaziquest.com: Designed and implemented a data based online recruitment platform that automated various aspects of recruitment such as job posting and applicant tracking and processing. Used Google based API's to enhance data analytics and provide targeted job postings to site users.

Sgtsafaris.com: Designed and implemented both back and front end using php, html, JavaScript and bootstrap.

Competencies

- Web application development with PHP(Laravel), JavaScript(React) and Python(Django).
- SAP, SAGE and Pastel enterprise resource planning system, implementation, audit and support.
- MySQL, Microsoft SQL database administration, support and implementation.
- Network administration and support.
- Basic financial reporting and bookkeeping.

EMPLOYMENT HISTORY

Contractor : Data Analyst

Nairobi

East African Breweries Limited *June 2019 – August 2019*

East African Breweries is the regional leading branded alcohol beverage manufacturer and seller. I was involved in the batch activation for raw materials which sought to better monitor inventory age and process costing.

My responsibilities included:

- Designed and implemented resource material batch management procedures and practices on the SAP ERP system. This enabled the organization to conform to ISO standards.
- Worked with stakeholders to come up with an action plan that ensured the project was carried out effectively and on time.
- Preparing training materials and training staff on batch activation and management.

Contractor : Software Developer

Nairobi

Kaziquest.com *February 2019 – March 2019*

Kaziquest Limited is an online recruitment platform that seeks to connect employers to skilled workers.

My responsibilities included:

- Collecting project requirements from the project owner and formulating a plan.
- Integrating Google indexing API and Google Cloud talent API to the platform
- Integrating M-pesa API to the platform
- Carrying out tests to features to ensure all features were working as specified.
- Deployed the application using secure servers and implemented redundancy
- Delivered the working application in two months

Full Stack Engineer

Nairobi

Wise and Agile Solutions Limited *October 2018 – January 2019*

As a system administrator, my tasks included:

- Participated in the implementation, deployment and support of the ESL Logistics Information

system called pro-kazi. The project digitized all operations of the business and its subsidiaries

- Provided support to various clients using the SAGE enterprise resource planning system.
- Provided support to various clients in the installation of various information security protocols and systems such as SOPHOS and CISCO firewalls
- Deploying and management of various web applications via Docker, Linux Virtual Servers and Microsoft SQL Server

IT & Operations Nairobi

CET Industrial Limited *September 2017 – September 2018*

As an IT and operations officer my roles included the following:

- Participated in the design and Implementation of a new ERP that eased the monitoring and handling of stock.
- Was involved in the implementation of new sourcing schedules and costing methods.
- Provided standby support and training for the ERP and other related infrastructure.
